TIME FRAME

b9 (1) (g) re (d)

BACKGROUND

The *Our North, Strong and Free* (ONSAF) directed that National Defence and the Royal Canadian Navy (RCN) “explore options for renewing and expanding their submarine fleet.”¹ Initial work consisted of open source and market analysis of available conventionally powered submarines to inform the transition to options analysis (December 2022) and the establishment of the integrated project team.

In 2023, representatives from National Defence, Innovation, Science and Economic Development Canada (ISED) and PSPC met with officials in Europe and Asia to conduct early engagement sessions and fact-finding visits in the six countries in which the companies being considered as potential builders are located. The countries visited included France, Germany, Japan, the Republic of Korea (ROK), Spain and Sweden. The overarching goal of these visits was to demonstrate Canada’s commitment to a submarine replacement program as well as to gather information and further develop an understanding of the state of the submarine industry. Prior to the next phase of the Project, Japan requested that it not receive any further inquiries with respect to the CPSP, as Japan is no longer interested in pursuing it for domestic reasons.

A request for information was published on CanadaBuys on September 15, 2024, and closed on February 28, 2025. In total, 25 responses were received, including seven from OEMs that were subsequently analyzed by the integrated project team.

ANALYSIS/CONSIDERATIONS

b9 (1) (g) re (d)

§9 (1) (g) re (d)

CONSULTATIONS

The attached letter was reviewed internally by Legal Services, and all comments have been addressed. External to PSPC, engagements and reviews were also conducted with National Defence, Global Affairs Canada and ISED.

NEXT STEPS

The CPSP was presented to the Deputy Minister's Governance Committee meeting on June 20, 2025. The Committee approved the next step

§9 (1) (g) re (d)

RECOMMENDATION

I recommended that you sign the attached letter

§9 (1) (g) re (d)

ANNEX A

BACKGROUND

1. ONSAF directed that DND and the RCN “explore options for renewing and expanding our submarine fleet.”¹ This activity commenced in 2021 with the establishment of the CPSP team to identify Ground Rules and Assumptions for the replacement of the VCS. Initial work consisted of open source and market analysis of available conventionally powered submarines to inform the transition to Options Analysis (December 2022) and establishment of the Integrated Project Team (IPT).
2. In 2023 the CPSP IPT, consisting of representatives from Innovation, Science and Economic Development (ISED) Canada, Public Services and Procurement Canada (PSPC), ADM(Mat), and the RCN, met with officials in Europe and Asia to conduct Early Engagement and Fact-Finding Visits with the six countries being considered as potential builders. These visits included France, Germany, Japan, Republic of Korea, Spain, and Sweden. Visits consisted of two days with one day dedicated to shipyard visits and presentations by potential builders and the second day consisting of Headquarters and training facility visits and military-to-military discussions. The overarching goal of these visits was to demonstrate Canada’s commitment to a submarine replacement program and to gather information and further develop an understanding of the state of the submarine industry. Prior to the next phase of the project, Japan requested that they not receive any further inquiries with respect to CPSP, as they were no longer interested in pursuing the project for domestic reasons.

Hi,

Attached is the [REDACTED] for subs and its annex. [REDACTED] will route formally once we align on the final version with dnd. There won't be more substantive changes, though. It's formatting, at this point.

Thank you,

Michelle N. Mascoll
